An exhibition by Ross Cochrane:

Is a record of the artist's journey and exploration of liminal landscapes and 'edge-lands' within Cavan Town and surrounding areas. By examining places through touch, the artist rediscovers and opens a dialogue into a sequence of ever-changing and diminishing landscapes, which intersect between former ecologies and new consumer topographies. The aim of the exhibition is to explore memories that remain embedded in the material fabric of the landscape, and which relate to a common community consciousness which the artist depicts, as a real defined object. The exhibition comprises of photographic and print media.
